Responsive Design in APEX

The screenshot displays a web application interface for a 'Sample Database Application'. The header includes a title bar with the application name and user navigation options (test, Mobile, Administration, Help, Logout). Below the header is a navigation menu with tabs for Home, Customers, Products, Orders, and Reports. A search bar is positioned below the navigation menu, containing the text 'Search customers, orders and product data'. The main content area is divided into two columns. The left column features a gauge chart titled 'Sales for this Month' with a needle pointing to the value 1,600. The right column displays a table titled 'Top Customers' with a list of customer names and their total order values. The table data is as follows:
