

## Oracle Fusion Inventory and Material Management

### Key words

Cloud Computing, Oracle Cloud Offering, Oracle Cloud Services

Oracle Fusion Applications, Oracle Fusion Inventory, Oracle Fusion Material Management, Oracle Fusion Material and Cost Management

## Comprehensive Inventory and Costing Visibility and Control

Oracle Fusion Inventory Management enables companies to effectively manage the inbound flow of goods, inventory storage, and outbound order fulfillment. The advanced Cost Management capabilities capture, track, and analyze costs associated with inventory items as they move through the supply chain.

### Overview

- Centralized monitoring of warehouse operations and key performance indicators for better task prioritization
- Work areas designed to guide users through critical tasks for streamlined shipping and receiving processes
- Views of product cost tailored to support effective product portfolio decisions by sales, accounting and operational managers
- Configurable product costs for improved regulatory compliance and transparency
