

APEX 5.1: Ausblick

Statement of Direction

- New Multi-Row Edit Region Type – Define a new region type with a modern UI for updating multiple rows of data and allow multiple regions on one page.
- Master / Detail / Detail – Provide a wizard interface to define declarative master/detail/detail regions.
- Declarative RTL Support – Provide declarative methods to control user interface direction, in support of properly rendering Universal Theme-based applications in both Left-to-Right and Right-To-Left languages.
- Packaged Applications – Improved framework and enhancements to the packaged applications.

APEX Summer School

- Neue Oracle interne Charting library
 - Polarcharts, Bubblecharts, Stockcharts
 - Interactive Reports & Websheets profitieren direkt

- Page Designer
 - Multiedit für Template Options
 - Layout anpassbar „keine Mauskilometer“

- App Diff mit grafischer Darstellung

VIELEN DANK.
